Manager's Report

MARKET REPORT

Gold Miners

This market background summary covers VanEck Gold Miners UCITS ETF and VanEck Junior Gold Miners UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck Gold Miners UCITS ETF returned 4.38% and VanEck Junior Gold Miners UCITS ETF returned -0.48%.
- Gold finished the first half of the year at the level of \$1,919.35, just 5.2% above the end of 2022 value of \$1,824.02. The first half of 2023 was a wild ride for Gold, sharply declining on strong economic data in the first months of 2023 and rising again on recession fears and banks collapsing, climbing to a new yearly high of \$2,063 per ounce on 4 May, a day after the U.S. Federal Reserve (Fed) took rates another 0.25% higher.
- A notable revision to first-quarter GDP annualized growth to 2% from 1.3%, along with other better-than-expected economic releases (e.g., U.S. May retail sales, housing starts, jobless claims, consumer sentiment), slowing inflation and comments from the Fed chairman and Treasury Secretary downplaying the risk of a recession, likely fueled the optimism.
- Both sub-funds felt the pressure of a declining gold price, down 2.5% and 3.9% respectively during the month of June. Following what was a dreadful month for gold equities in May, we were pleased to see the equities performing much more in line with our expectations in June. We expect strong gold mining sector fundamentals in a year when average gold prices are at record highs (\$1,934 in the first half of 2023), will lead to a progressive contraction of the valuation gap between the metal and the stocks.
- Our outlook for higher gold prices in the longer term is unchanged, supported by the risks imposed by sustained elevated interest rates, sticky inflation, continued global geopolitical tensions, a trend by countries around the world to diversify away from the U.S. dollar and increase their gold reserves, and the pending risk of a U.S. and/or global economic recession. Investors continue to stay on the sidelines of the gold market. Global gold bullion ETF holdings, our proxy for investment demand, declined 1.64% during the month of June, leading to net outflows year-to-date of 1.21%.
- Gold failed to hold above \$1,950 per ounce. It may now trade sideways around the \$1,900 level, until a new catalyst emerges. A Fed skip, signaling the nearing of the end of the tightening cycle, failed to provide impetus for gold and attract investors. But as the end of the hiking cycle approaches, the reasons for a pause (fear to launch the economy into a recession or into a deeper recession) and the implications on inflation, could become important gold price drivers.

Morningstar US Sustainable Wide Moat

This market background summary covers VanEck Morningstar US Sustainable Wide Moat UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck Morningstar US Sustainable Wide Moat UCITS ETF returned 11.81%.
- VanEck Morningstar US Sustainable Wide Moat UCITS ETF seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Morningstar US Sustainable Moat Focus Index™ (MSUSSMNU). The index targets U.S. companies with sustainable competitive advantages, i.e., “moats,” and attractive valuations in the view of Morningstar’s team of more than 100 equity analysts, subject to ESG screening based on Sustainalytics data.
- According to the forward-looking process of Morningstar’s Equity Research group, companies with moats have the potential to create above-average returns for longer periods of time. The index’s approach to investing in U.S. companies with wide economic moats when they are attractively priced has resulted in long-term outperformance versus the broad U.S. equity market.

Manager's Report (continued)

MARKET REPORT (continued)

Morningstar US Sustainable Wide Moat (continued)

- In the first half of 2023 Moat Index saw slow decrease in exposure to financials as a result of banking crisis in the US as well as Technology sector that rapidly improved in valuation but became largely overvalued according to Morningstar estimates. Technology sector played a significant role in overall performance of the strategy during the reporting period.

Morningstar Global Wide Moat

This market background summary covers VanEck Morningstar Global Wide Moat UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck Morningstar Global Wide Moat UCITS ETF returned 7.58%.
- VanEck Morningstar Global Wide Moat UCITS ETF provides exposure to global firms with Morningstar Economic Moat Ratings that are trading at the lowest current market price/fair value ratios.
- As of 30 June, most of the companies in the index were located in the US (with more than 55% weight), United Kingdom (almost 9%) and France (slightly more than 6%). Top 3 sectors of Global Wide Moat companies were Industrials, Financials and Consumer Staples.

Emerging Markets Government Debt

This market background summary covers VanEck J.P. Morgan EM Local Currency Bond UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck J.P. Morgan EM Local Currency Bond UCITS ETF returned 7.15%.
- Within emerging markets debt, local currency bonds have historically provided the greatest diversification benefit compared to U.S. dollar-denominated emerging markets sovereign or corporate bonds, as measured by the segment's relatively low correlation to other asset classes.
- Continued inflationary pressures may benefit commodity sensitive currencies.
- Local currency bonds (based on EMLC's index) now provide a yield of around 7.3%, a significant pick-up over 7-year US Treasuries.
- Many EM central banks were well ahead of the Fed in hiking rates over the past two years and maintain a hawkish bias to keep inflation in check, while also providing room to ease if needed (as is the case in China). The result has been both higher yields and positive real rates, which provides support to local currencies.
- Average credit quality of the local EM benchmark is investment grade (Baa2/BBB) and multiple notches higher than the hard currency benchmark, which is on average high yield (Ba1/BB+), reflecting the difference in composition.

Emerging Markets Corporate Debt

This market background summary covers VanEck Emerging Markets High Yield Bond UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck Emerging Markets High Yield Bond UCITS ETF returned 1.74%.
- EM high yield corporates currently provide an overall average yield of around 10%, a yield pickup of ~1.6% over US high yield, while maintaining similar levels of duration.
- While providing higher yields, EM universe contains a greater portion of bonds rated BB, and fewer rated CCC and below, versus high yield U.S. and Developed Market corporate bonds.

Manager's Report (continued)

MARKET REPORT (continued)

Emerging Markets Corporate Debt (continued)

- From a fundamental standpoint, EM issuers currently exhibit more favorable debt metrics versus US high yield issuers including interest coverage and leverage; as a result, investors are getting paid more by issuers with less leverage.
- EM high yield corporate bonds may benefit from elevated global inflation, with high exposure to sectors such as Energy (21%) and Basic Materials (11%).

Fallen Angels

This market background summary covers VanEck Global Fallen Angel High Yield Bond UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck Global Fallen Angel High Yield Bond UCITS ETF returned 3.56%.
- Fallen angel bonds are part of the overall high yield universe but unique in that they were originally issued with investment grade ratings and later downgraded to non-investment grade, or high yield. This results in differentiating characteristics versus the broader high yield bond market—such as, a higher average credit quality—and the crossover from investment grade to high yield markets is where the value proposition of fallen angels originates.
- Yield to Worst of the ETF was relatively stable in the first half of the year and as of 30 June 2023 was 7.51% (while as of 31 December 2022 it was 7.62%) reflecting already high level of interest rate and potential slowdown in further rate hikes.
- Although the spreads have tightened by 40 bps since May 23, they have largely stayed stable since the beginning of the year.
- As of 30 June 2023, the ETF had a 23.6% allocation to the energy sector, which could continue benefiting from disruptions following the Russia-Ukraine conflict and geopolitical turmoil.

Global Mining

This market background summary covers VanEck Global Mining UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck Global Mining UCITS ETF returned -2.99%.
- Many secular trends have driven increased demand for green metals such as copper, lithium, and rare earth elements in recent years, and that demand is only expected to increase moving forward. Technological advancements—including those technologies and applications needed for the transition from fossil fuels to a low carbon economy—are expected to continue to fuel the next wave of demand.
- The conflict in Ukraine has added a level of urgency to the energy transition and also raised other national security concerns, all of which can be tied back to these metals. Many rare earth elements for example are used in radar technology, jet engines, and missile defense systems, and many governments have signaled increases to defense spending.
- Large, diversified metals and mining companies are heavily involved in the extraction and processing of green metals but, their revenues and expenses are often far more influenced by industrial metals such as aluminum and iron ore.
- Commodity prices, broadly speaking, are at levels only seen at the peak of the super cycle when demand was burgeoning and supply was the concern. Today, we have multiple headwinds to both demand and supply, yet back to similar price levels.

Manager's Report (continued)

MARKET REPORT (continued)

Video Gaming and eSports

This market background summary covers VanEck Video Gaming and eSports UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck Video Gaming and eSports UCITS ETF returned 28.50%.
- Mobile gaming continues to dominate industry revenues and provides the most growth by segment (compared to PC and console). This is further boosted by increasing internet connectivity, the development of high bandwidth network such as 5G and rising adoption of smartphones worldwide.
- Sector recognition by EU authorities: the EU parliament passed a resolution where it acknowledges the value of the video game ecosystem as a major cultural and creative industry. Once the bill takes concrete shape these companies will benefit from both a financial and legitimacy standpoint.
- The AI boom will influence also the videogaming industry. In May Sony CEO announced that the company AI division will be collaborating with playstation developers, in order to create more immersive and unique experiences. Also other game developers are making active use of AI to improve the gaming experience and make it feel more real. For example the racing series Forza saves players' driving habits and uploads them into avatars who then compete with the players themselves; all in an effort to make the game closer to reality.
- A revolution of the revenue model is under way with "game as a service" replacing "game as a product". Revenues generated under this model are known as recurrent consumer spending and substitute a single revenue-generating fee. Consumers don't carry out anymore a single initial purchase to buy the product but instead engage in more frequent spending over time. The game as a service trend is being accompanied by the in game spending phenomenon that sees players carrying out regular purchases within the gaming environment. Popular games, who turned out to be great successes, adopted this business model.
- The Play to Earn trend (P2E) is on the rise with gamers who have the chance to earn cash, prizes and digital assets by playing and participating in various games. It is an entirely new gaming business model where economic benefits flow not only in the direction of publishers but also gamers.
- Within the P2E trend crypto games are emerging. Just like traditional gaming, also crypto gaming is filled with a variety of games and is based on the concept of integrating gaming and crypto in the same environment. These games are built on the blockchain and players can earn crypto by playing and completing tasks.

Semiconductor

This market background summary covers VanEck Semiconductor UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023 VanEck Semiconductor UCITS ETF returned 49.00%.
- The growth in demand for electronic chips is also driven by the artificial intelligence sector. The computing power needed for this technology requires the use of a large number of semiconductors. On Tuesday 30 May, Nvidia (a company specialising in graphics cards and artificial intelligence) exceeded \$1,000 billion in market capitalisation.
- Semiconductors remain at the heart of industrial sovereignty issues. On 8 April 2023, Thierry Breton (European Commissioner for the Internal Market) announced the implementation of the "European Chips Act", which aims to strengthen the European semiconductor industry by doubling its share of global chip production. Semiconductor companies look poised to benefit from such development.
- The rivalry between China and the United States over the supply of semiconductors continues. China has launched an investigation into the American giant Micron to detect any "risks" to its "national

Manager's Report (continued)

MARKET REPORT (continued)

Semiconductor (continued)

security". This investigation is taking place against a backdrop of tension between the two powers. The US are seeking to restrict China's access to powerful electronic chips, while China is trying to emancipate itself from the United States and develop its own semiconductor industry.

Hydrogen

This market background summary covers VanEck Hydrogen Economy UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023 VanEck Hydrogen Economy UCITS ETF returned -6.24%.
- Hydrogen is the simplest energy dense element that if burned for fuel only, produces water as its byproduct. A fuel cell combines hydrogen and oxygen to produce energy. The challenge has been in producing hydrogen fuel cells at a scale. Falling costs of production along with government and corporate interest alike is supportive of this nascent technology.
- Last May, the renewable energy sector in the United States was hit hard by discussions about the US debt ceiling. A reduction in the debt ceiling could lead to a reduction in the subsidies granted to the industry under the IRA (Inflation Reduction Act) plan.
- Although the negative performance YTD, we remain positive on this rapidly expanding renewable form of energy whose applications could range from cars to planes through ships and industrial establishments.

Digital Assets

This market background summary covers VanEck Crypto and Blockchain Innovators UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck Crypto and Blockchain Innovators UCITS ETF returned 151.25%.
- Digital transformation companies engage in a wide variety of business lines within the broader ecosystem such as: payment gateways, hardware, crypto miners, exchanges, crypto holding and trading, software and value added services, banking and asset management.
- Market anticipation of a potential Fed pivot later this year, systemic risks and the next Bitcoin halving cycle approaching supported cryptocurrencies who registered strong performance.
- The mini-bank crisis in the US favoured Bitcoin and highlighted the appeal of bearer assets who can be self custodied and are not affected by central banks' policy making. Bitcoin's limited supply can be seen as a hedge against expanding money supply and inflationary pressures. Moreover, other systemic risks might be lurking, for example due to the high level of interest rates which can give way to additional turmoil in the financial sector.
- Cryptocurrencies and the correlated digital assets equities also benefited from the recent filing for a spot Bitcoin ETF by the largest asset manager worldwide, which boosted speculations that approval might soon be coming from the SEC. This could prove to be an important catalyst for the sector.
- VanEck Crypto and Blockchain Innovators UCITS ETF is a pure-play product investing in companies truly involved in the blockchain ecosystem. Digital assets equities can be viewed as a leveraged bet on digital assets, outperforming them during bull markets but underperforming them over market downturns. Over H1 2023, digital assets equities registered excellent performance. In particular crypto miners led the sector amidst higher crypto prices and lower energy costs, which improved the profitability of mining activities.

Manager's Report (continued)

MARKET REPORT (continued)

Rare Earth

This market background summary covers VanEck Rare Earth and Strategic Metals UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck Rare Earth and Strategic Metals UCITS ETF returned 8.16%.
- Rare earths access and availability continues to be a hot topic worldwide: in fact, these 17 metal elements keep being necessary for technological developments and key advancements across various sectors. From computers and batteries to defense systems and monitors they are of vital importance.
- China keeps producing a good part of the entire annual amount of rare earths extracted, with the sector assuming almost the characteristics of a monopoly. On the fear of deteriorating relationships with China, the US department of defense carried out consistent investments to strengthen their position. It is recent the news of an important deal with the listed Australian company Lynas Rare Earths to build one of the first US rare earths facilities. Western nations are in fact striving to achieve a higher degree of independency with this respect. The US in particular have the goal of insourcing the full rare earths supply chain, without relying anymore extensively on other countries.
- Europe has also come recently under the spotlight after the largest rare earths site of the old continent was discovered in Sweden. Although some years will have to go by before it is fully operative, the potential to satisfy a good part of Europe's demand is there. The investments and activity going on in Scandinavia suggest that a rare earths cluster might be under development in the region. LKAB, the company discovering the Swedish site, recently acquired a majority stake in REET, a Norwegian firm that has developed a more efficient and less carbon-intensive separation process. This capital injection will help the company build the first rare earth separation facility in Norway, expected to begin operations in 2024.
- VanEck Rare Earth and Strategic Metals UCITS ETF saw over the period financial multiples remaining constant and profitability margins improving, sign that the miners are managing well their operations and cost structures.
- Summing up, we keep being positive on the outlook for these strategic elements. In particular, we believe that they will play a vital role in the green transition whose pace has been accelerating over the last year because of multiple factors. Rare earths are in fact relevant for electric vehicles and wind turbines, just to mention a couple, and thus will be relevant in the decarbonisation process that is taking place worldwide. Moreover, their future supply is forecasted to lag the expected demand, which could support positively their price dynamics.

China New

This market background summary covers VanEck New China ESG UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck New China ESG UCITS ETF returned -0.14%.
- China keeps being on the way of a structural change that sees consumer-oriented sectors replacing heavy industries. Factors contributing to this shift are a growing upper middle class, further technological developments, an aging population and a particularly high number of millennials in the country.
- The transition towards a new economic model keeps being under way: the sectors shaping the Chinese economy include healthcare, consumer staples and discretionary as well as technology.
- VanEck New China ESG UCITS ETF achieved a slightly negative performance over the first half of 2023. The reopening narrative was quickly replaced by worse than expected economic data as well

Manager's Report (continued)

MARKET REPORT (continued)

China New (continued)

as fears of possible deflation affecting the country. China is at the moment the only major economy who is not struggling to bring inflation down, but instead is battling with the opposite dynamic.

- Although the poor performance we remain optimistic on the trends that are expected to shape the country for the decades to come.

Smart Home

This market background summary covers VanEck Smart Home Active UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023 VanEck Smart Home Active UCITS ETF returned 16.1%.
- The smart home industry is vast. It brings together manufacturers from all over the world who produce components, software or services. The giants of the tech world have all released products for the smart home market. Most recently, in January 2023, Apple launched its HomePod Gen 2.
- In a February 2022 report, McKinsey estimated that up to \$265 billion worth of medical services (representing up to 25% of the total cost of care) could shift from traditional facilities to the home by 2025 without a reduction in quality or access.
- Faced with higher costs of living crisis, households can employ smart home solutions to become more resilient and cut costs. The example of energy shows how households adopted smart home solutions such as solar panels, energy management systems, and heat pumps, to lower their cost of living. More saving opportunities are emerging in other areas of our daily lives as the gap between in-home and out-of-home experiences becomes easier to bridge.
- The Internet of Things is becoming increasingly popular, since the data collected by connected objects can now be supplied in real time to artificial intelligence software. This is why the big tech companies (such as Alphabet, Microsoft, Apple and Amazon) are investing heavily in this sector.

Space

This market background summary covers VanEck Space Innovators UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck Space Innovators UCITS ETF returned 12.45%.
- The US aerospace and defense market is expected to grow from USD 416.63 billion in 2020 to USD 550.78 billion by 2030.
- The race for space continues, and emerging countries are determined to play their part. On Monday 26 March 2023, India successfully launched 36 satellites, completing its programme to launch 600 satellites into low-Earth orbit.
- A technology shift is simplifying access to space, shrinking the cost of reaching the stars. VanEck's Space ETF tracks the progress of the innovative companies developing tomorrow's equipment, disrupting established operators, shaping the commercial space age.

Future of Food

This market background summary covers VanEck Sustainable Future of Food UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck Sustainable Future of Food UCITS ETF returned -5.71%.

Manager's Report (continued)

MARKET REPORT (continued)

Future of Food (continued)

- The agri-food industry's level of impact on the environment is dwarfed by other measures, such as the use of fresh water, deforestation levels and biodiversity. With environmental limits already straining the traditional agriculture supply chain, feeding an ever-growing population presents a unique challenge. Going forward, we expect increasing demand for cleaner, healthier, and more environmentally sustainable foods will continue to create growth opportunities.
- The global food crisis that is inundating countries around the world is becoming more glaring, possibly catastrophic and likely longer lasting. Sharp rise in food price that we saw in 2022 made many consumers switch to more basic and conventional products instead of focusing on sustainable consumption habits. While the situation is normalizing, we expect consumers to shift their habits long-term towards more sustainable and plant-based alternatives. The FAO Food Price Index was down 23.4% from its peak in March 2022.

Genomics and Healthcare Innovators

This market background summary covers VanEck Genomics and Healthcare Innovators UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck Genomics and Healthcare Innovators UCITS ETF returned -0.44%.
- VanEck's Genomics ETF invests in the innovative companies harnessing scientific advances to develop breakthrough treatments and give patients more control over how they access care.
- The healthcare market in America alone, consumes 18% of GDP, equivalent to \$3.6trn a year. In other wealthy countries, the share is lower, around 10%, but it is increasing as populations age. Just as science is developing new gene therapies, so too the pandemic has made people comfortable with digitally-mediated care.

Circular Economy

This market background summary covers VanEck Circular Economy UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck Circular Economy UCITS ETF returned 0.35%.
- The VanEck Circular Economy UCITS ETF invests in companies involved in a new economic model that is expanding rapidly. Circular economy is a model of production and consumption which involves sharing, leasing, reusing, repairing, refurbishing and recycling existing materials and products in order to extend their lifecycle as long as possible. These companies are at the forefront of the recycling and reuse-related solutions, opposed to the traditional take-make-waste economy.
- This new economic model not only entails environmental benefits but also tangible economic advantages. As an example, it is estimated that recycled aluminium and copper require 95% and 85% less energy respectively, compared to primary material production.
- As the world gradually transitions towards a carbon-free economy, waste management, recycling and reuse solutions are set to be on the rise. We expect the companies actively involved in this thematic to benefit from this development.

Bionic Engineering

This market background summary covers VanEck Bionic Engineering UCITS ETF.

- For the period from 1 January 2023 to 30 June 2023, VanEck Bionic Engineering UCITS ETF returned 12.95%.

Manager's Report (continued)

MARKET REPORT (continued)

Bionic Engineering (continued)

- As the global population ages, so does the demand for biologically-inspired systems that improve the quality of later life. VanEck's Bionic Engineering ETF tracks the performance of the portfolio of innovative companies delivering medical, dental or vision-related implants, bioprinting, prosthesis, or preservation of organs and tissue.

Uranium and Nuclear Technologies

This market background summary covers VanEck Uranium and Nuclear Technologies UCITS ETF

- For the period from 3 February 2023 to 30 June 2023, VanEck Uranium and Nuclear Technologies UCITS ETF returned 2.44%.
- As the global demand for electricity continues to rise, the need for clean and reliable sources of energy becomes increasingly important. Nuclear energy, with its low carbon emissions and high efficiency, is a vital part of the sustainable energy mix.
- Uranium prices moved steadily higher in 2023's second quarter as positive catalysts continued to build. Prices for the energy fuel traded solidly above the US\$50 per pound level in Q2.
- While Germany closed its last nuclear reactors in the first half of 2023, many other countries made significant moves towards further adoption of nuclear energy, among them Poland and the UK.

Defense

This market background summary covers VanEck Defense UCITS ETF

- For the period from 31 March 2023 to 30 June 2023, VanEck Defense UCITS ETF returned 13.13%.
- The global tensions of the last few years have arguably shaken the largely negative view of Western Europeans towards the Defense industry. The importance of military preparedness as a deterrent against adverse regimes became one of the prevalent topics in public discussions. Countries across Europe, many of whom have been perennial violators of NATO's 2% spending rule, pledged increased defense spendings to prepare for emerging threats.
- Continuous war in Ukraine brings more and more contracts to defense companies across the globe in order to supply the country with defensive machines from one side and to modernize armies, long neglected by the feeling of peace.
- Countries across the globe keep announcing new help packages to Ukraine, with Germany approving in May 2023 its largest package so far, approximately 3 bn USD, consisting of military hardware, including armoured personnel carriers, 30 Leopard tanks, reconnaissance drones and ammunition.

Oil Services

This market background summary covers VanEck Oil Services UCITS ETF

- For the period from 31 March 2023 to 30 June 2023, VanEck Oil Services UCITS ETF returned 4.65%.
- Oil services companies included in the ETF are positively correlated with oil, which represented historically a hedge for inflation. Moreover, they possess pricing power over the downstream players in the sector, thus being able to contrast well periods of widespread price increases. Although in fact inflation is coming down, there are forces on a global scale that could make it stickier than expected. An exposure to the upstream oil services sector could help in such a dynamic.

VanEck UCITS ETFs plc

Manager's Report (continued)

MARKET REPORT (continued)

Oil Services (continued)

- Upstream oil services companies have started 2023 in a significantly better financial shape than past periods, mainly thanks to higher energy prices over 2022. They have also managed to reduce their debt levels.
- A recent decision from the Organisation of the Petroleum Exporting Countries (OPEC) to cut the number of barrels per day could be supportive of oil prices dynamics, although the slower-than-expected start from China.

SUB-FUND REPORT

Investment Objective

The investment objective of the sub-funds is to track or replicate, before fees and expenses, the price and yield performance of the indices listed in the table below.

Investment Objective of VanEck Smart Home Active UCITS ETF

The Company has appointed DASYM Managed Accounts B.V. as investment advisor for the sub-fund with a discretionary mandate. The investment objective of the sub-fund is to seek long-term capital appreciation by investing primarily in equity securities of companies which are active in, maintain assets in, or derive revenues from smart homes and intelligent building solutions. The sub-fund is actively managed and in order to achieve its investment objective, the sub-fund will invest, in a manner consistent with the UCITS Regulations and the Central Bank requirements, into a global portfolio of equity or equity-related securities of companies listed or traded on a Regulated Market set out in Appendix 2 of the Prospectus.

Sub-Fund Performance

*** Until 16 December 2022, the performance of VanEck Video Gaming and eSports UCITS ETF was achieved with a different investment policy.

**** VanEck Genomics and Healthcare Innovators UCITS ETF's inception date is 2 September 2022. VanEck Circular Economy UCITS ETF's inception date is 21 October 2022. VanEck Bionic Engineering UCITS ETF's inception date is 2 December 2022. Sub-funds' performance and indices' performance do not cover the entire reported period.

Manager's Report (continued)

MARKET REPORT (continued)

Sub-Fund Performance (continued)

***** VanEck Uranium and Nuclear Technologies UCITS ETF's inception date is 3 February 2023. VanEck Defense UCITS ETF's inception date is 31 March 2023. VanEck Oil Services UCITS ETF's inception date is 31 March 2023. Sub-funds' performance and indices' performance do not cover the entire reported period.

Important information on performance

The performance data quoted represents past performance. All sub-fund and Index performances are calculated in USD.

Past performance is not a guarantee of future results. Performance information for the sub-fund is net of expenses and/or fees. These returns do not reflect the deduction of taxes that a shareholder would pay on the sale of sub-fund shares.

Investment return and value of the shares of the sub-fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted.

The "Net Asset Value" (NAV) of a VanEck UCITS ETFs Plc sub-fund is determined at the close of each business day, and represents the dollar value of one share of the sub-fund; it is calculated by taking the total assets of the sub-fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with sub-fund returns. Investors cannot invest directly in the Index. Returns for actual sub-fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Tracking Error

The realised tracking error is the annualised standard deviation of the difference in daily returns between a sub-fund and its index. Tracking error shows the consistency of the returns relative to the index over the defined period of time.

Anticipated tracking error is based on the annualised standard deviation of the difference in daily returns between a sub-fund and its index under normal market conditions.

Cash management, efficient portfolio management techniques including securities lending, transaction costs from rebalancing and currency hedging can have an impact on tracking error as well as the return differential between the cash component of the sub-fund. Importantly, these impacts can be either positive or negative depending on the underlying circumstances.

In addition to the above, the sub-funds may also have a tracking error due to withholding tax charged to the sub-funds on any income received from its investments. The level of tracking error arising due to withholding taxes depends on various factors such as any reclaims filed by the sub-funds with various tax authorities, any benefits obtained by the sub-funds under a tax treaty or any securities lending activities carried out by the sub-funds.

MARKET REPORT (continued)

The **MVIS® Global Rare Earth/Strategic Metals Index (MVREMXTX)** tracks the performance of the largest and most liquid companies in the global rare earth and strategic metals industry. This is a modified market cap-weighted index, and only includes companies that generate at least 50% of their revenue from rare earth and strategic metals or that have ongoing mining projects that have the potential to generate at least 50% of the company's revenue from rare earth and strategic metals. The index includes refiners, recyclers, and producers of rare earth and strategic metals and minerals. MVREMXTX covers at least 90% of the investable universe.

The **MVIS® Global Rare Earth/Strategic Metals Index (MVREMXTX)** is the exclusive property of MarketVector Indexes GmbH (a wholly owned subsidiary of VanEck Associates Corporation), which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards MarketVector Indexes GmbH, Solactive AG has no obligation to point out errors in the Index to third parties. VanEck Rare Earth and Strategic Metals UCITS ETF is not sponsored, endorsed, sold or promoted by MarketVector Indexes GmbH and MarketVector Indexes GmbH makes no representation regarding the advisability of investing in the sub-fund.

Hypothetical Growth of USD10,000 (Since inception, 24 September 2021)

This chart shows the value of a hypothetical USD 10,000 investment in the sub-fund at NAV and at Share Price over the past year. The result is compared with the sub-fund's benchmark.

Manager’s Report (continued)

MARKET REPORT (continued)

The **MarketGrader New China ESG Index (MGNCUSNR)** consists of the 100 most fundamentally sound companies (being companies with good financial results based on an analysis of each company’s income statements, statements of cash flows and balance sheets) with the most solid growth prospects in China’s new economy sectors (Consumer Discretionary, Consumer Staples, Health Care and Technology) that are domiciled in China. In addition, the companies selected into the Index are compliant (above median performers) with Environmental, Sustainability and Governance (ESG) criteria based on the OWL Analytics consensus ESG Score.

The Index is published by MarketGrader. The Index Provider does not sponsor, endorse, or promote the sub-fund and bears no liability with respect to the sub-fund or any security. The Index Provider will notify the sub-fund of material errors in the Index via the Index Provider’s website.

Hypothetical Growth of USD10,000 (Since inception, 24 September 2021)

This chart shows the value of a hypothetical USD 10,000 investment in the sub-fund at NAV and at Share Price over the past year. The result is compared with the sub-fund’s benchmark.

Manager's Report (continued)

MARKET REPORT (continued)

The **VanEck Smart Home Active UCITS ETF** will invest in a concentrated actively managed portfolio of approximately 40 to 60 global equity or equity-related securities issued by companies which are active in, maintain assets in, or derive revenues from activities in respect of smart homes and intelligent building solutions, for example working, dining, exercising and studying. The strategy determines the sector and regional positioning by bottom-up stock selection. The Investment Advisor seeks to select companies that disproportionately profit (i.e. increase in earnings) from the changing role of the home in the life of consumers.

The Manager has appointed Dasym Managed Accounts B.V. as investment advisor for the sub-fund (the Investment Advisor) with a discretionary mandate. The Investment Advisor carries out discretionary services focused around fundamental and quantitative research, security selection and portfolio management pursuant to the terms of the investment advisory agreement.

Hypothetical Growth of USD10,000 (Since inception, 5 November 2021)

This chart shows the value of a hypothetical USD 10,000 investment in the sub-fund at NAV and at Share Price over the past year. The result is compared with the sub-fund's benchmark.

Notes to the Financial Statements

1. Organisation

VanEck UCITS ETFs plc, formerly VanEck Vectors™ UCITS ETFs plc, (the “Company”) with a registered number of 548554 was incorporated on 26 August 2014 under the laws of Ireland. The Company is a public limited company with variable capital and is structured as an umbrella sub-fund with segregated liability between sub-funds established pursuant to the Companies Act 2014. The sole objective for which the Company is established is the collective investment in transferable securities and/or other liquid financial assets as pursuant to the UCITS Regulations and Central Bank UCITS Regulations. The Company was authorised by the Central Bank of Ireland on 8 December 2014 with its registered office at 33 Sir John Rogerson’s Quay, Dublin 2, Ireland.

The Board of Directors agreed to remove the term “Vectors” and Trademark from the Company and sub-fund names effective from 16 February 2022.

As at 30 June 2023, the Company consisted of twenty three active sub-funds, collectively the “sub-funds”, and individually the “sub-fund”. As at 30 June 2023, each sub-fund had one share class in issue – USD A Share class (31 December 2022: one share class in issue – USD A Share class).

VanEck Junior Gold Miners UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to track, before fees and expenses, the price and yield performance of the MVIS® Global Junior Gold Miners Index (the “Index”).

VanEck Gold Miners UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to track, before fees and expenses, the price and yield performance of the NYSE Arca Gold Miners Index (the “Index”).

VanEck Morningstar US Sustainable Wide Moat UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to track, before fees and expenses, the price and yield performance of the Morningstar® US Sustainability Moat Focus IndexSM (the “Index”).

VanEck Morningstar Global Wide Moat UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to track, before fees and expenses, the price and yield performance of the Morningstar® Global Wide Moat Focus IndexSM (the “Index”).

VanEck J.P. Morgan EM Local Currency Bond UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the J.P. Morgan GBI EM Global Core Index (the “Index”).

VanEck Global Fallen Angel High Yield Bond UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the ICE Global Fallen Angel High Yield 10% Constrained Index (the “Index”).

VanEck Emerging Markets High Yield Bond UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the ICE Diversified High Yield US Emerging Markets Corporate Plus Index (the “Index”).

VanEck Global Mining UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the S&P Global Mining Reduced Coal Index (the “Index”).

VanEck Video Gaming and eSports UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate as closely as possible, before fees and expenses, the price and yield performance of the MarketVector™ Global Video Gaming and eSports ESG Index (the “Index”).

VanEck Semiconductor UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the MVIS® US Listed Semiconductor 10% Capped Index (the “Index”).

Notes to the Financial Statements (continued)

1. Organisation (continued)

VanEck Hydrogen Economy UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the MVIS[®] Global Hydrogen Economy Index (the "Index").

VanEck Crypto and Blockchain Innovators UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the MVIS[®] Global Digital Assets Equity Index (the "Index").

VanEck Rare Earth and Strategic Metals UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the MVIS[®] Global Rare Earth/Strategic Metals Index (the "Index").

VanEck New China ESG UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate, before fees and expenses, the price and yield performance of the MarketGrader New China ESG Index (the "Index").

VanEck Smart Home Active UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to seek long-term capital appreciation by investing primarily in equity securities of companies which are active in, maintain assets in, or derive revenues from smart homes and intelligent building solutions.

VanEck Space Innovators UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate the price and the yield performance, before fees and expenses, of the MVIS[®] Global Space Industry ESG Index (the "Index") that provides exposure to the performance of companies involved in the global space exploration, equipment and communications industries.

VanEck Sustainable Future of Food UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate the price and the yield performance of the MVIS[®] Global Future of Food ESG Index (the "Index"), before fees and expenses, that supports sustainable food production and development and provides exposure to the performance of companies involved in food and agricultural technology, organic foods, or food companies that display high standards in food waste, food safety or environmental impact.

VanEck Genomics and Healthcare Innovators UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate the price and the performance, before fees and expenses, of the MVIS[®] Global Future Healthcare ESG Index (the "Index") that provides exposure to the performance of a representative portfolio of companies involved in the genomic healthcare and electronic healthcare industries.

VanEck Circular Economy UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate the price and the performance, before fees and expenses, of the MVIS[®] Global Circular Economy ESG Index (the "Index") that provides exposure to companies involved in the “Circular Economy”, which is commonly viewed as including companies involved in the following sectors: water purification and treatment products or services, waste-to-energy and biofuels, general waste management services that include recycling services and metal recycling services, as well as companies deriving revenues from products that are made of - or services related to - recycled, repurposed, or reused materials.

VanEck Bionic Engineering UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate the price and the performance, before fees and expenses, of the MVIS[®] Global Bionic Healthcare ESG Index (the "Index") that provides exposure to companies involved in the bionic implants industry including medical, dental, or vision-related implants, bioprinting, prosthesis, or preservation of organs and tissue.

Notes to the Financial Statements (continued)

1. Organisation (continued)

VanEck Uranium and Nuclear Technologies UCITS ETF (the "sub-fund")

The investment objective of the sub-fund is to replicate the price and the performance, before fees and expenses, of the MarketVector™ Global Uranium and Nuclear Energy Infrastructure Index (the "Index") that provides exposure to companies involved in Uranium mining and distribution or in projects related to the construction, engineering and maintenance of nuclear power facilities and nuclear reactors, equipment and technology or services to the nuclear power industry development and commercialization of nuclear fusion technology or molten salt nuclear reactor research as well as exchange-listed funds that track the spot price of uranium or invest in physical uranium.

VanEck Defense UCITS ETF (the "sub-fund")

The investment objective of the sub-fund is to replicate the price and the performance, before fees and expenses, of the MarketVector™ Global Defense Industry Index (the "Index") that provides exposure to entities involved in serving national defense industries.

VanEck Oil Services UCITS ETF (the "sub-fund")

The investment objective of the sub-fund is to replicate the price and the performance, before fees and expenses, of the MarketVector™ US Listed Oil Services 10% Capped Index (the "Index") that provides exposure to the performance of companies involved in oil services to the upstream oil sector being activities which relate to oil equipment, oil services and oil drilling.

As at 30 June 2023, the sub-funds of the Company are listed on Euronext Dublin, London Stock Exchange, Borsa Italiana, XETRA and Six Swiss Exchange.

2. Basis of Preparation

These condensed interim unaudited financial statements have been prepared on a going concern basis which assumes that the Company will continue in operational existence for the foreseeable future. These condensed interim unaudited financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss.

The preparation of these condensed interim unaudited financial statements in conformity with International Financial Reporting Standards ("IFRS") requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates.

The Board of Directors make estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. There are no estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities.

New standards, amendments and interpretations issued and effective for the financial period beginning 1 January 2023

There are a number of standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 January 2023.

The following new and amended standards and interpretations are not expected to have a significant impact on the Company's financial statements:

- Annual Improvements to IFRS Standards 2018-2020.
- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2).
- Definition of Accounting Estimates (Amendments to IAS 8).
- Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12).

Notes to the Financial Statements (continued)

2. Basis of Preparation (continued)

New standards, amendments and interpretations issued but not effective for the financial period beginning 1 January 2023 and not early adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2023, and have not been early adopted in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the Company.

The following new and amended standards and interpretations are not expected to have a significant impact on the Company's financial statements:

- Classification of Liabilities as Current or Non-current (Amendments to IAS 1).
- Lease Liability in a Sale and Leaseback (Amendments to IFRS 16).

3. Significant Accounting Policies

These condensed interim unaudited financial statements have been prepared in accordance with IAS 34, "Interim Financial Reporting", and Irish Statute comprising the Companies Act 2014, the UCITS Regulations and the Central Bank UCITS Regulations. These condensed interim unaudited financial statements should be read in conjunction with the annual audited financial statements for the financial year ended 31 December 2022.

4. Share Capital

The Authorised Share Capital of the Company is 2 subscriber shares of €1 each and 1,000,000,000,000 participating shares of no par value. There are no rights of pre-emption attached to the shares.

The company complies with the minimum investment limits by ensuring that registered shareholder holds a minimum of 50,000 shares.

Shareholders are entitled to attend and vote at general meetings of the Company. Every shareholder, holding shares that are present in person or by proxy shall have one vote and on a poll, every shareholder present in person or by proxy shall have one vote for every share of which they are the holder.

The Directors are authorised to allot relevant securities up to an amount equal to the authorised share capital of the Company. No shares were allotted during the financial period ended 30 June 2023 and the financial year ended 31 December 2022.

The Directors reserve the right to reject, in whole or in part, any application for shares. In particular, if the Directors determine that it would be detrimental to the existing shareholders to accept a cash application for shares of any sub-fund which represents more than 10% of the Net Asset Value of such sub-fund, the Directors may decide that all or part of the application for shares in excess of 10% be deferred until the next Dealing Day. If the Directors decide to defer all or part of the application in excess of 10% the applicant shall be informed prior to the deferral taking place.

Capital Management

The redeemable participating shares issued by each sub-fund provide a shareholder with the right to request redemption for cash at a value proportionate to the registered shareholder's share in the net assets at each redemption date. The Company's objectives in managing the redeemable shares are to ensure to maximise returns to all registered shareholders, and to manage liquidity risk arising from redemptions.

VanEck UCITS ETFs plc

Notes to the Financial Statements (continued)

4. Share Capital (continued)

The share issued and share redeemed in USD are included within the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. During the financial period ended 30 June 2023 the number of redeemable shares issued was as follows:

5. Cash and Cash Equivalents

The cash balances and bank overdraft at the financial period ended 30 June 2023 and the financial year ended 31 December 2022 were held at the Depository. As at 30 June 2023 the sub-funds VanEck Sustainable Future of Food UCITS ETF had an overdraft balance of USDNil (31 December 2022: USD688), VanEck Genomics and Healthcare Innovators UCITS ETF had an overdraft balance of USDNil (31 December 2022: USD10,255), VanEck Crypto and Blockchain Innovators UCITS ETF had an overdraft balance of USD666 (31 December 2022: USDNil) and VanEck Space Innovators UCITS ETF had an overdraft balance of USD500 (31 December 2022: USDNil). The credit rating of State Street Custodial Services (Ireland) Limited was AA- at 30 June 2023 (31 December 2022: AA-).

Notes to the Financial Statements (continued)

6. Financial Assets and Financial Liabilities at Fair Value through Profit or Loss

IFRS 13 'Fair Value Measurement' requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities in the Condensed Statement of Financial Position.

The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value. The fair value of financial assets and financial liabilities traded in an active market (such as trading securities) are based on quoted market prices at the close of trading on the reporting date.

The quoted market price used for financial assets held by the sub-funds is the current bid price; the appropriate quoted market price for financial liabilities is the last traded price.

A financial instrument is regarded as quoted in an active market if the quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

The fair value of financial assets and financial liabilities that are not traded in an active market is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at the reporting date. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

As the fair values of the investments for VanEck Junior Gold Miners UCITS ETF, VanEck Gold Miners UCITS ETF, VanEck Morningstar Global Wide Moat UCITS ETF, VanEck Morningstar US Sustainable Wide Moat UCITS ETF, VanEck Global Mining UCITS ETF, VanEck Video Gaming and eSports UCITS ETF, VanEck Semiconductor UCITS ETF, VanEck Hydrogen Economy UCITS ETF, VanEck Crypto and Blockchain Innovators UCITS ETF, VanEck Rare Earth and Strategic Metals UCITS ETF, VanEck New China ESG UCITS ETF, VanEck Smart Home Active UCITS ETF, VanEck Space Innovators UCITS ETF, VanEck Sustainable Future of Food UCITS ETF, VanEck Genomics and Healthcare Innovators UCITS ETF, VanEck Circular Economy UCITS ETF, VanEck Bionic Engineering UCITS ETF, VanEck Uranium and Nuclear Technologies UCITS ETF, VanEck Defense UCITS ETF and VanEck Oil Services UCITS ETF are based on quoted prices in active markets, the sub-funds' financial assets measured at fair value are considered Level 1 for the financial period ended 30 June 2023 and financial year ended 31 December 2022 with the exception of Xebec Adsorption Inc with fair value of USD515 classified as Level 2 for the financial year ended 31 December 2022 for VanEck Hydrogen Economy UCITS ETF.

As the fair values of the investments for VanEck J.P. Morgan EM Local Currency Bond UCITS ETF, VanEck Global Fallen Angels High Yield Bond UCITS ETF and VanEck Emerging Markets High Yield Bond UCITS ETF are based on inputs other than quoted prices, the sub-funds' financial assets are considered Level 2 for the financial period ended 30 June 2023 and financial year ended 31 December 2022.

Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the financial period. The following security transferred from Level 2 to Level 3: Xebec Adsorption Inc with fair value of USD527 for the financial period ended 30 June 2023 on the Sub-Fund VanEck Hydrogen Economy UCITS ETF. The ongoing conflict between Russia and Ukraine has led to significant disruption and volatility in the global stock market. As a result of this, the fair value of Russian securities held within the sub-funds experienced a sharp decline. These Russian securities can be seen in the table below:

Fund Name	Security Name	Level as at 30 June 2023	Level as at 31 December 2022
VanEck Global Mining UCITS ETF	Alosa PJSC	3	3

Notes to the Financial Statements (continued)

6. Financial Assets and Financial Liabilities at Fair Value through Profit or Loss (continued)

Fund Name	Security Name	Level as at 30 June 2023	Level as at 31 December 2022
VanEck Global Mining UCITS ETF	MMC Norilsk Nickel PJSC	3	3
VanEck Global Mining UCITS ETF	Polyus PJSC	3	3

There was one Level 3 security Firefinch Ltd with fair value of USD168,198 for the financial period ended 30 June 2023 for VanEck Junior Gold Miners UCITS ETF. There were four Level 3 securities Alrosa PJSC with fair value of USD68, AVZ Minerals Ltd with fair value of USD179,228, MMC Norilsk Nickel PJSC with fair value of USD2 and Polyus PJSC with fair value of USD1 for the financial period ended 30 June 2023 for VanEck Global Mining UCITS ETF. There was one Level 3 security Xebec Adsorption Inc with fair value of USD527 for the financial period ended 30 June 2023 for VanEck Hydrogen Economy UCITS ETF. There was one Level 3 security AVZ Minerals Ltd with fair value of USD1,736,206 for the financial period ended 30 June 2023 for VanEck Rare Earth and Strategic Metals UCITS ETF. There were eight Level 3 securities for the financial year ended 31 December 2022.

The Company's assets and liabilities (by class) not measured at fair value at financial period ended 30 June 2023 or financial year ended 31 December 2022 but for which fair value is disclosed within the fair value hierarchy are considered Level 2, except for cash and cash equivalents, which are considered Level 1.

7. Efficient Portfolio Management

The Company may, on behalf of each sub-fund and subject to the conditions and within the limits laid down by the Central Bank of Ireland, employ techniques and instruments relating to transferable securities for efficient portfolio management purposes. Transactions for the purposes of efficient portfolio management may be undertaken with a view to achieving a reduction in risk, a reduction in costs or an increase in capital or income returns to a sub-fund and may not be speculative in nature.

The sub-funds may invest in financial derivative instruments ("FDI") for efficient portfolio management or hedging purposes. The sub-funds may use futures, swaps and currency forwards for the purpose of reducing risk associated with currency exposures within the sub-fund. These techniques and instruments may include investments into hedging transactions on currencies to protect against a decline in the value of investments denominated in currencies other than USD, and against any increase in the cost of investments denominated in currencies other than USD. The sub-funds employ the commitment approach to assess the global exposure and to ensure that the sub-fund's use of derivative instruments is in accordance with the requirements of the Central Bank of Ireland.

Forward foreign currency contracts can be used to hedge out unwanted currency exposures and to limit the sub-funds exposure to anticipated changes in exchange rates. There are no forward foreign currency contracts held at the financial period ended 30 June 2023 and the financial year ended 31 December 2022.

The sub-funds may enter into stock lending, repurchase and/or reverse repurchase agreements for the purposes of efficient portfolio management in accordance with the provisions of the Central Bank UCITS Regulations. The sub-funds did not enter into such agreements during the financial period ended 30 June 2023 or the financial year ended 31 December 2022.

8. Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On this basis, it is generally not chargeable to Irish tax on its income or gains.

However, Irish tax can arise on the happening of a "chargeable event" in the Company. A chargeable event includes any payments of distributions to shareholders, any encashment, repurchase, redemption, cancellation or transfer of shares and any deemed disposal of shares as described below for Irish tax

Notes to the Financial Statements (continued)

8. Taxation (continued)

purposes arising as a result of holding shares in the Company for a period of eight years or more. Where a chargeable event occurs, the Company is required to account for the Irish tax thereon.

No Irish tax will arise on the Company in respect of chargeable events where:

- a) certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations; or
- b) any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- c) an exchange of shares representing one sub-fund for another sub-fund of the Company; or
- d) an exchange of shares arising on a qualifying amalgamation or reconstruction of the Company with another company; or
- e) certain exchanges of shares between spouses and former spouses.

In the absence of an appropriate declaration, the Company will be liable to Irish tax on the occurrence of a chargeable event. There were no chargeable events during the financial period under review. Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Company or its shareholders.

9. Expenses

Total Fee

The Total Fee, a percentage of the Net Asset Value of the relevant class of shares, is payable by the Company out of the sub-funds' assets to the Manager.

The Total Fee incurred by the Company during the financial periods ended 30 June 2023 and 30 June 2022 are detailed below.

	Total Fee Financial period ended 30 June 2023	Total Fee Financial period ended 30 June 2022
VanEck Junior Gold Miners UCITS ETF	Up to 0.55% per annum*	Up to 0.55% per annum*

For sub-fund launches, terminations and name changes, please refer to Note 13.

* Or such lower amount as may be advised to Shareholders from time to time.

From the Total Fee charged to each sub-fund the Company covers and pays all of the ordinary fees, operating costs and expenses payable by the sub-funds, including investment management and advisory fees, directors' fees, registration, transfer agency, administration and depositary fees, registrar fees, regulators and auditors, marketing fees and certain legal expenses of the Company. Refer to pages 42 to 51 for details of the Total fee for each sub-fund.

The Manager has agreed to discharge the Company's audit fee and KPMG Ireland's non-audit services, out of the Total Fee. Such fees will be borne by the Manager.

10. Related Parties

Mr. Adam Phillips, Mr. Jonathan R. Simon, Mr. Bruce Smith (resigned 30 June 2023) and Mr. Gijsbert Koning are related to VanEck Associates Corporation and also serve as directors or officers of affiliates of VanEck Associates Corporation.

Ms. Mary Canning, Mr. Jon Lukomnik and Mr. Adrian Waters are independent directors. Mr. Adam Phillips, Mr. Jonathan R. Simon and Mr. Bruce Smith (resigned 30 June 2023) also serve as Supervisory Board members of the Manager, VanEck Asset Management B.V. Mr. Jon Lukomnik is also an independent director of the VanEck US mutual funds. Mr. Gijsbert Koning is a director of VanEck Asset Management B.V. Mr. Adrian Waters, Mr. Jon Lukomnik and Ms. Mary Canning are entitled to receive a directors' fee of €20,000 (31 December 2022: €20,000) per annum as payment for their services to the Company. For the financial period ended 30 June 2023 the Directors were paid a total fee of €30,000 (30 June 2022: €30,000).

As outlined on page 3 of this report, VanEck Associates Corporation acts as Investment Managers to certain sub-funds of the Company pursuant to an investment management agreement between the Manager and the Investment Manager. VanEck Asset Management B.V. (the "Manager") acts as Manager and Distributor. The Manager is a 99% owned subsidiary of VanEck Associates Corporation. The Manager receives the net amount of Total fees less operating costs and expenses payable by the sub-funds as disclosed in Note 9. The Total fee is disclosed in the Condensed Statement of Comprehensive Income and amounts owed at the financial period end are disclosed in the Condensed Statement of Financial Position.

Notes to the Financial Statements (continued)

10. Related Parties (continued)

VanEck Switzerland AG and VanEck (Europe) GmbH are related parties, by virtue of the fact that they have a distribution agreement with the Manager and have the same ultimate parent group, VanEck Associate Corporation, which held 1,595,000 (31 December 2022: 1,550,000) shares in the Company.

MV Index Solutions, the index provider of the MVIS Global Junior Gold Miners Index, which the VanEck Junior Gold Miners UCITS ETF seeks to track and the MarketVector Global Video Gaming and eSports ESG which the VanEck Video Gaming and eSports UCITS ETF seeks to track, is a wholly owned subsidiary of VanEck Associates Corporation. The index licensing fees related to the VanEck Global Junior Gold Miners Index and the VanEck Video Gaming and eSports UCITS ETF are borne by the Manager. MV Index Solutions was paid a fee of USD537,808 for the financial period ended 30 June 2023 (30 June 2022: USD433,087).

Mr. Gijsbert Koning held 65,413 shares, purchasing 7,159 shares during the financial period and holding 72,572 shares with a value of USD868,621 as at 30 June 2023. Angkor Holding B.V., an entity controlled by the Mr. Gijsbert Koning, held 12,504 shares at the beginning of the financial period, and the shares were held by Mr. Gijsbert Koning as Director. The entity held 8,800 shares with a value of USD312,841 as at 30 June 2023. All transactions with Angkor Holding B.V. and Mr. Gijsbert Koning during the period were on normal commercial terms.

Two record holders of shares own 59.92% of the Company on behalf of Nominee accounts.

Connected Persons Transactions

Regulation 41 of the Central Bank UCITS Regulations "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the unitholders of the UCITS".

As required under Central Bank UCITS Regulation 78.4, the Directors, as responsible persons are satisfied that there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 41(1) are applied to all transactions with a connected person; and all transactions with a connected persons that were entered into during the financial period to which the report relates complied with the obligations that are prescribed by Regulation 41(1).

11. Contingent Liabilities and Commitments

There were no significant liabilities or commitments as at financial period ended 30 June 2023 and financial year ended 31 December 2022.

The Investment Manager did not enter into any directed brokerage services on behalf of the sub-funds during the period ended 30 June 2023 and year ended 31 December 2022.

12. Segregation of Liability

Under the provisions of the Companies Act 2014, the Directors maintain for each sub-fund a separate portfolio of assets. As between shareholders, each portfolio of assets is invested for the exclusive benefit of the relevant sub-fund. The shareholders are only entitled to the assets and profits of that sub-fund in which they participate. The Company is considered one single legal entity. With regard to third parties, in particular towards the Company's creditors, the Company is responsible for all liabilities incurred by a sub-fund exclusively based on the assets of this relevant sub-fund. Among the shareholders, the liabilities of each sub-fund shall only be incurred to the sub-fund.

While the provisions of the Companies Act provide for segregated liability between sub-funds, these provisions have yet to be tested in foreign courts, in particular, in satisfying local creditors' claims.

Accordingly, it is not free from doubt that the assets of a sub-fund of the Company may not be exposed to the liabilities of other sub-funds of the Company.

Notes to the Financial Statements (continued)

13. Sub-fund launches, terminations and name changes events

Effective 16 February 2022 the term "Vectors" and Trademark was removed from the Company name and sub-funds.

A Global Depositary Receipt (GDR) is very similar to an American depositary receipt or an ADR. It is a type of bank certificate that represents shares in a foreign company, such that a foreign branch of an international bank then holds the shares. The shares themselves trade as domestic shares, but globally, various bank branches offer the shares for sale.

An American Depositary Receipt (ADR) is a stock that trades in the United States but represents a specified number of shares in a foreign corporation. ADRs are bought and sold on American markets just like regular stocks, and are issued/sponsored in the U.S. by a bank or brokerage.

* In accordance with the Central Bank UCITS Regulations, the interim report documents material changes that have occurred in the disposition of the assets of the Company during the financial period. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of the purchases for the financial period and/or aggregate disposals greater than 1 per cent of the total value of sales for the financial period. If there are fewer than 20 purchases/sales that meet the material changes definition, the Company shall disclose those purchases/sales so at least 20 purchases/sales are disclosed.

* In accordance with the Central Bank UCITS Regulations, the interim report documents material changes that have occurred in the disposition of the assets of the Company during the financial period. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of the purchases for the financial period and/or aggregate disposals greater than 1 per cent of the total value of sales for the financial period. If there are fewer than 20 purchases/sales that meet the material changes definition, the Company shall disclose those purchases/sales so that at least 20 purchases/sales are disclosed.

A Global Depositary Receipt (GDR) is very similar to an American depositary receipt or an ADR. It is a type of bank certificate that represents shares in a foreign company, such that a foreign branch of an international bank then holds the shares. The shares themselves trade as domestic shares, but globally, various bank branches offer the shares for sale.

An American Depositary Receipt (ADR) is a stock that trades in the United States but represents a specified number of shares in a foreign corporation. ADRs are bought and sold on American markets just like regular stocks, and are issued/sponsored in the U.S. by a bank or brokerage.

* In accordance with the Central Bank UCITS Regulations, the interim report documents material changes that have occurred in the disposition of the assets of the Company during the financial period. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of the purchases for the financial period and/or aggregate disposals greater than 1 per cent of the total value of sales for the financial period. If there are fewer than 20 purchases/sales that meet the material changes definition, the Company shall disclose those purchases/sales so at least 20 purchases/sales are disclosed.

* In accordance with the Central Bank UCITS Regulations, the interim report documents material changes that have occurred in the disposition of the assets of the Company during the financial period. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of the purchases for the financial period and/or aggregate disposals greater than 1 per cent of the total value of sales for the financial period. If there are fewer than 20 purchases/sales that meet the material changes definition, the Company shall disclose those purchases/sales so at least 20 purchases/sales are disclosed.
